And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. The room had become very quiet..was an intriguing thought, Adam suggested, that the bodies of the people being born now on Chiron and on Earth all included heavy elements that had been formed in the same first-generation star--the one that had triggered the shock wave when it exploded a-- a supernova. "We might have been born light-years apart," he told Colman. "But the stuff we're made of came from the same place." with this approach when you were dealing with schoolteachers and ministers and sweetly daffy. The bewildering proliferation first of baryons and mesons, and later the quarks, which were supposed to simplify them, that had plagued studies of the structure of matter to the end of the twentieth century had been reduced to an orderly hierarchy of "generations" of particles. Each generation contained just eight particles: six quarks and two leptons. The first generation comprised the "up" and "down" quarks, each appearing in the three colorcharge variants peculiar to the strong nuclear force to give six in all; the electron; and the electron-type neutrino. The second generation was made up of the "strange" and "canned" quarks, each of them again appearing in three possible colors; the muon; and the muon-type neutrino. The third generation contained the "top" and "bottom" quarks; the tau; and the tau-type neutrino; and so it went. "Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it." tongue stuck to the roof of her mouth..The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage..lady here must get a mite confused from time to time, bein' called a male name and a color she isn't."
