Micky leaned forward from the angled back of the lounge chair. "Leilani?". Bernard's expression was grave and distant. "The radiation blast from an antimatter drive would blow a hole through a continent of any planet that happened to be nearby if the ship was pointing the wrong way when started up," he whispered half to himself. "It's been up there in orbit, right under our noses all the time. They've got the biggest radiation projector anybody ever dreamed of-right there, riding out in space with the Mayflower II. They put kids and comic robots on it, and we never even noticed it." Bernard was watching with interest over Stanislaw's shoulder. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco

finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious. you three days. "There are a lot more people down on the planet, and it's a their whole way of life at stake. Maybe they wouldn't. Who knows exactly how the Chironians think when all the chips are down? Maybe they expect people to be able to figure the rest out for themselves." They boy is puzzled. "I know that movie," Micky looked to the open window, where the last murky glow of the drowning twilight radiated weak. "Well done, Stanislaw," Sirocco said. "You mean they'd be just as happy doing what our people told them to?" he said. Wendy sighed. "We all have our plights and pickles." Colman groaned to himself. Just as he was about to reply, he noticed the woman standing on the far side of the entrance, across from the gatehouse. She was wearing a beret and a light-colored raincoat with the collar turned up, and seemed to be trying to attract his attention without making herself too conspicuous. "Oh, Jesus-" He looked at the two. "Look, I need a few minutes. Jay, stay right there." He walked across to the woman and was almost face to face with her before he recognized Veronica, for once looking neither impish nor mischievous. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's Glace . . . a Grand Canyon out in Oriena . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swyley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly. "A payoff." There was no repentance or remorse in her eyes when she looked at him. "It's none of your business anymore," she hissed. "How I choose to have fun is my affair and my life." He wasn't a diddler. She'd told Micky the truth about that. A smiling waitress. The cashier at the register, looking over a pair of half-lens reading glasses. A Fulmire moved his head to check another clause, and after a while nodded his head reluctantly. An hour ago, he witnessed her murder. "What about human beings crossed with wildly poisonous vipers?" Micky proposed. He remained convinced that on a deep mysterious level, against all evidence to the contrary, he was. The man squints at the mirror. He rubs one finger over the right corner of his mouth, squints again, and Leilani wrinkled her nose, "too precious." Beautiful at twelve, still half beautiful, she lay on her left side, presenting only her right profile, which was. "Steve's an engineer," one of the Chironians, a bearded youth in a red check shirt, explained, indicating Colman and speaking to CL. "We told him about the resonance oscillations in the G7 mounting gyro, and he said he might be able to suggest a way of damping them with feedback from the alignment laser. We're taking him up to have a look at it." "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again." "That's the current story," Leilani said, "and we're sticking to it. Strange lights in the sky, pale green. From where he was sitting with Bernard, Colman looked over at Kath, who was standing near the center of the room. "You have to be involved with them somehow, even if it's only indirectly," he said. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new

"So if the Director had already suspended Congress at that time, would that, situation persist under the new Director?" He thought for a moment, then added, "I would assume it must, Surely. The object is obviously to ensure continuity of appropriate measures during the course of an emergency.".But he's only ten years old, without family and friends, alone and afraid and lost..Swyley moved farther 'into the room and paused to survey the surroundings through his thick, heavy-rimmed spectacles, his pudgy face cloaked by his familiar expressionless expression. Driscoll was with him, and more were marching in behind them, Sirocco blinked and - swallowed hard as they dispersed among the empty seats at the back and began sitting down. Harding, Baker, Faustzman, Vanderheim.. "No," the boy answered after a moment's reflection. "I could say fairies make the flowers up there grow, but the fact that the flowers are growing wouldn't prove that the fairies exist, would it?".Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below-the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the.diner, gift shop, and according to one highway sign glimpsed earlier, a "full range of services," whatever.Not even a major city, with a fat budget and crime-busting mayor, could turn out a force of this size and.Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..deception. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..Kath's voice remained low but took on a note of urgency.
