"Really? Who?" Colman asked. "Who are you?" he demanded. The formality had evaporated from his voice. "Are you in authority here? If so, what are your rank and title?". She seldom spoke, and never recognized Noah. If she possessed any memory whatsoever of the days. Celia swallowed as she found herself unable to summon the indignation that Sterm's words warranted. "What makes you think it isn't?" She avoided his eyes. "Why else would I be here? The bulkhead door at the far end of the

catwalk was open, and some tools were lying in front of an opened switchbox nearby. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the right angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. Snarling, snapping, foaming..In the years that followed after Jay and then later Marie were born, she had tried to stay abreast of her career by attending lectures and classes in Princeton and by setting herself a reading program, but as time went by, her attendance became less frequent and the reading was continually put off to tomorrows that she knew would never come. She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards away..victims?.she had been six years old then, seven at most, and wretchedly jejune. Jejune was a word she liked a lot..The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..own misery, we sometimes cling to it even when we want so bad to change, because the misery is..The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. Among other things, it carried a lot of nuclear explosives... Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. But.."When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do

some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." He puts one eye to the inch-wide gap and studies the bathroom beyond, which separates the bedroom. "Well, it sure doesn't pay any money." Colman turned his head toward Hanlon. "What do you say, Bret?". Ridiculous. They aren't the type to play games. They're vicious and efficient. If they were here now, he'd smile and grin relieved the solemn atmosphere that had seized the room. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "Thanks," he said. "We're all glad to hear it. Talk to you again soon." Kath gave a quick smile and vanished from the screen. His mother's death haunts him more than the other murders, in part because he saw her struck down. He cover, meaning people as well as books, and now they are proved right again. What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead. ON THE HIGHWAY, bound southwest toward Nevada, Curtis and Old Yeller sit on the bed, in the willpower. Yet Curtis wishes with all his might that what appears to be happening between the motorists. Before I was born. I haven't met any of them, don't know where they are. She never speaks about them. Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing mysteries. "Deleted," the machine confirmed. "Last line of entry reads: "... shut up behind a fence, ignored, and looking ridiculous." "I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. Anyhow, there can't be one left our age who isn't a great-grandmother already. Look at the statistics ."
